SUBJECT INDEX, VOLUME XVII

Acrylonitrile, polymerization in homogeneous solution, 275
Adsorption, influence on capillary dimensions of viscometers, 137, 154
Amine accelerators, effect on methyl methacrylate–benzoyl peroxide polymerization, 403
Ammonium persulfate, as polymerization initiator, 428
Azobisisobutyronitrile, as polymerization initiator, 428
Benzoyl peroxide, as polymerization initiator, 428
  to polyvinyl acetate radical, chain transfer constant, 438
Benzoyl peroxide–methyl methacrylate polymerization, effect of amine accelerators, 403
Bis-type modifiers, 221, 319
Block copolymers, preparation and characterization, 51
Bulk polymerization, styrene, 319
Butadiene, emulsion polymerization, 319
Cellulose, viscosity behavior of dilute solutions in cuprammonium, 583
Chain length determination, by light scattering, 133
Chain transfer agents, Q and e values, 142
Chain transfer constant, benzoyl peroxide to polyvinyl acetate radical, 438
  polymethyl methacrylate, 45
Copper (II) complexes, polyacrylic and polymethacrylic acid, 442
Counter ion activity, polyelectrolyte solutions, 365
Cross-termination in copolymerization, 375
Crystalline polymers, spherulitic structure, 291, 351, 447
Crystallization, in natural rubber, 547
Degradation, thermal, of 66 nylon, 587
Density gradient tubes, construction, 441
Dextran, acid-hydrolyzed, properties, 527
Di-*n*-butyl adipamide, pyrolysis, 587
Diffusion, of polyacrylonitrile solutions, 81
Disulfides, behavior in bulk styrene polymerization, 221
e values, for chain transfer agents, 142
Elastomers, tensile strength, 511
Emulsion polymerization, butadiene, 319
Enzyme models, relation to inclusion compounds, 479
Films, polymer, light scattering from, 21
Fractionation anomalies, and polymer association, 147
Free radical copolymerization, penultimate unit effect, 125
Gels, tensile strength determination, 179
Hydrogen peroxide, as vinyl polymerization initiator, 65
Infrared absorption spectra, for polymerization rate measurement, 269
Infrared studies on natural rubber, 255
Inhibition periods, in vinyl acetate polymerization, 156
Intrinsic viscosity, graphic method for single-point determination, 215
Intrinsic viscosity–molecular weight relation, polyacrylonitrile, 473
Kinetics of vinyl acetate polymerization, 435
Light scattering, of acid-hydrolyzed dextran, 527
  for chain length determination, 133
  of polar chain polymer solutions, effect of electric field, 341
  of polydisperse system of rods, angular distribution, 432
  polymethyl methacrylate in dilute solution, 391
  for polyvinyl acetate molecular weight determination, 117
  from thin polymer films, 21
Light scattering data, extremely dilute polystyrene solutions, 130
Lucite, dielectric constant-strain coefficient, 191
Mechanical properties, dynamic, of polymethyl methacrylate, 151
Methyl methacrylate–benzoyl peroxide polymerization, effect of amine accelerators, 403
Methyl methacrylate–styrene polymerization, 45
Moisture permeability-molecular weight relation, polyisobutylene, 145
Molecular entanglements, 135
Molecular orientation, in polymer spherulites, 351
Molecular weight averages, effect of loss of low molecular weight polymers on, 263
Molecular weight dependence, of polystyrene chain extension, 99

Molecular weight determination, polyvinyl acetate, 117
polyvinylpyrrolidone, 247
Molecular weight–intrinsic viscosity relation, polyacrylonitrile, 473
Molecular weight measurements, standard polystyrene samples, 1
Molecular weight–moisture permeability, polyisobutylene, 145
Novolacs, structural analysis, 411
Nylon 6, crystal structure, 159
yarn, undrawn properties, 311
Nylon 66, thermal degradation, 587
Penultimate unit effect, in free radical copolymerization, 125
Polar chain polymer solutions, effect of electric field on light scattering, 341
Polyacrylic acid, copper (II) complexes, 442
Polyacrylonitrile, intrinsic viscosity–molecular weight relation, 473
Polyacrylonitrile solutions, concentrated, gelation of, 89
viscosity, diffusion, sedimentation, 81
Polycaproamide, crystal structure, 159
Polydisperse system of rods, angular distribution of the light scattered, 432
Polyelectrolytes, fractionation, 591
Polyelectrolyte solutions, counter ion activity, 365
Polyester resins, unsaturated, Trommsdorf effect in, 107
Polyesters, linear, from vanillic acid, 553
Polyethylene, irradiated, permeability to gases, 417
Polyisobutylene, moisture permeability–molecular weight relation, 145
Polymer/solvent interactions in dilute solution, 559
Polymethacrylic acid, copper (II) complexes, 442
Polymethyl methacrylate, chain transfer constant, 45
dilute solution properties, 391
dynamic mechanical properties, 151
Polystyrene, dielectric constant–strain coefficient, 191
standard samples, molecular weight measurements, 1
Polystyrene chains, extension, 99
Polystyrene solutions, extremely dilute, light scattering data, 130
Polyvinyl acetate, molecular weight determination, 117
Polyvinyl acetate radical, from benzoyl peroxide, chain transfer constant, 438
Polyvinylpyrrolidone, molecular weight determination, 247
Pyrolysis, of di-*n*-butyl adipamide, 587
Q values, for chain transfer agents, 142
Radiation, high-energy, and behavior of polymers, 141
Rate of polymerization, measurement by infrared absorption spectra, 269

of polyacrylonitrile solutions, 81
polymethyl methacrylate in dilute solution, 391
Viscosity behavior, dilute solutions of cellulose in cuprammonium, 583
Viscosity measurements, in branched silicones, 379
Viscosity techniques, for polyvinyl acetate molecular weight determination, 117
